Classic rock, punk, blues, and generation X in a blender. It can be rough or it can be tender. Tidal waves of rhythm, towing you under. Smooth as rain, and then sharp as thunder. A Key West hurricane rocking the stage, that's the sound of Gibson Cage!

The above statement is a true, original description of Gibson Cage. Heavy on one end, and light on the other... Gibson Cage, at 6' 4" tall, is a name and face to remember. In the preparatory stage of a planned 2011 national and international tour, we are actively seeking performance venues for 2010 dates throughout the United States.

With an all-star cast behind him, including famed Gibson Cage producer **Dale Russell (formerly of The Guess Who)**, Cage's dedication, perserverance, and over 10 years of writing amazing award-winning original material has finally came to fruition. **The likes of Russell, Jeff "Skunk" Baxter of the Doobie Brothers / Steely Dan, and Bob Kulick of W.A.S.P., KISS, and Meat Loaf fame all recorded with him on his last album.** His current touring band consists of rockin' cats from throughout Florida that have national touring experience. Longtime Tesla member Tommy Skeoch has performed in Gibson's band for his last few performances, and he is joined on stage by a dynamite female backup vocalist.

One might be hard pressed to define the music of Gibson Cage...a fusion of southern rock, jazz, blues, blue grass, grunge, gospel, country, and some heavy metal.... but that is exactly what has made fans fall in love with the music!

The range of his vocals can go from as smooth as butterscotch to as raw as Janis Joplin's heart and soulfull-to-many-cigarettes-followed-by-a-whiskey-chaser sound-all culminating in a voice as earthy and lusty as it is rich and pure. It is Cage being so indefinable that defines him and his music - a new hard and edgy genre, so to speak, and now, Cage will bring his powerhouse music and unique voice to the world.

The Gibson Cage show is just that ---- a SHOW. Feel free to request audio and video samples of this amazing songwriter, stage performer, showman, and vocalist. Your audience will feel and understand the driving beats, the heady guitar, and those coarse but rich vocals.

We've attached a few group photos and shots of Gibson to this document.
